REMARKS

Claim Amendment

The amendment to claim 17 is supported in the specification as filed, e.g., at page 5, lines 15-17 ("about 0.075mM"), and throughout the specification where the use of the alkanolic acid component is described in amounts less than 0.075 mM (see, e.g., Figure 1 and Example 1 at page 10).

Entry of the above claim amendment is respectfully requested.

Discussion

Applicants believe the above claim amendment places claim 17 in condition for allowance, as it now recites the use of an alkanolic acid component in the subculture medium at a concentration of less than 0.075 mM.

Reconsideration of the present application is respectfully requested.

Respectfully Submitted,
